**Presentation by Youth Leadership Institute**

Cynthia Rocha from Youth Leadership Institute explained the project they are working on with the youth to limit the use of tobacco, alcohol and sugary drink ads at child eye level and covering a large percentage of the windows. The young people are working on a proposal to present to Council to help promote a healthier community. Discussed store front window state law that it can only cover 33% of windows, but there are no regulations for walls or fences. When they did the assessment they found 46% is out of compliance. Youth proposed having less than 33% allowed in the windows, also that alcohol or tobacco advertisement placement should not be below 3 feet. Last year at the Swedish festival they had a booth and surveyed the community. People felt safer shopping at stores with less ads and less clutter. They understand stores need to advertise, but they are looking at the placement, wall space, and the percentage of window covering. The Committee asked for clarification of what they will be asking from Council. Ms. Rocha clarified they will asking for new regulations for placement and percentage. The Committee asked how many youth are involved. Ms. Rocha said a couple college youth, one high school and some middle school students.
